2. Introduction

2.1. Overview

Live Request is a feature of SilverBlade System that enables the Subscribers to request for Credit Information Reports (CIR) through a web service platform (i.e. the internet).

The Live Request application processes the request obtained from the Subscribers in XML format and generates the CIR as Data Packets in XML format.

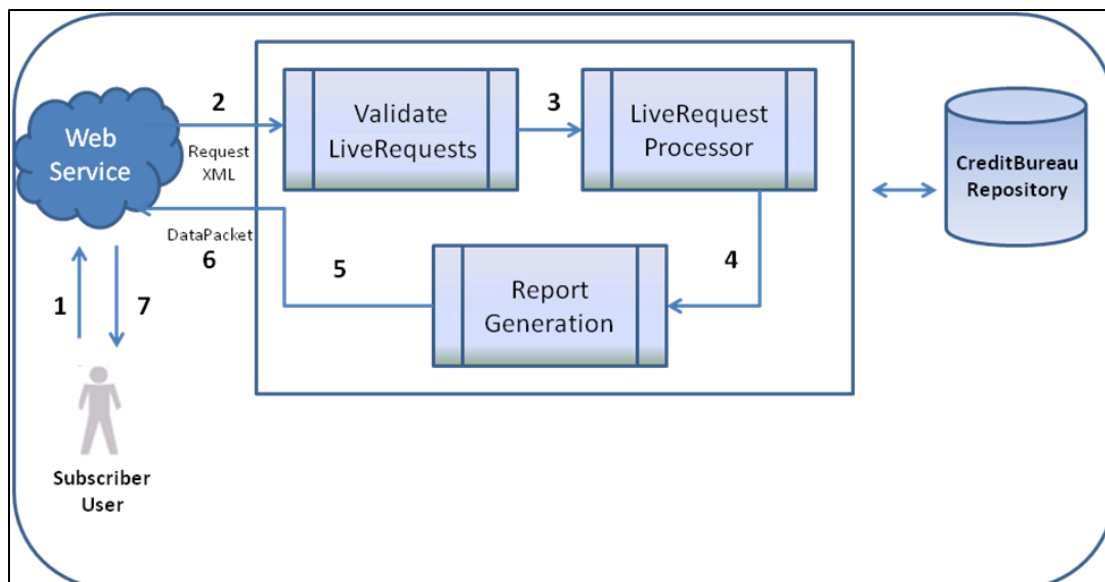

2.2. Prerequisites

The prerequisites for availing Live Request service are as follows:

- Internet access from the Subscriber's system that is used for accessing the SilverBlade Live Request System
- An application to perform the following tasks:
 - To send the Request XML Data Packet
 - To receive, read and interpret the Response XML Data Packet
- Possess valid User Name and Password for accessing the SilverBlade Live Request System

3. Live Request Process

3.1. Process Overview

The Live Request process involves the following steps:

1. To utilize the Live Request feature, the Subscribers should develop a web service client, which can generate the request XML in compliance with SilverBlade Live Request System's pre-defined XML format file. Predefined XML format includes the search parameters required to identify the Subject. The Subscriber can place only 1 request at a time.
2. To send the request, Subscriber's system should invoke the **ReqLiveReport** method with the following 3 parameters:

Request XML: This is the Live Request XML containing request data.

UserName: This is the UserName used for logging into the Credit Bureau website.

Password: This is the password used for the corresponding UserName.

3. Bureau System validates and processes the Live Request for its format, data types and concurrence to minimum and maximum occurrences of tags
4. Post validation of the request, the Live Request Processor uses the search parameters to identify matches in the Bureau repository
5. Once the Subject Identification process is completed, then the Bureau System triggers the report generation process wherein the required XML Data Packet is generated in the

event of a single hit. In the case of multi-hit (multiple search results), the response XML contains the search results.

6. In the case of multi-hit, the Subscriber user is required to send back another Request XML containing the details of the Subject (or Subjects, in case of merger of reports) to generate the Report XML.

NOTE:

- Live Request is a live connection for request and response. The Subscriber can decide on how to use/format the response XML being provided by Bureau
- Since Live Request works through secured HTTP, the response from Bureau is secured through SSL
- Any inquiry made as part of the Live Request, that results in the Report XML shall be displayed in the 'Inquiry History' section of the Credit Information Report. In case of merger of reports, the inquiry will be logged against the primary subject alone.

3.2. Terminologies

Tag: - It is a string of characters that uniquely defines a unit of data, or element, in a XML file. It is preceded and followed by "<" and ">" symbols respectively.

Parent Tag: - It is a container tag for a set of related XML tags.

Attribute: - It is a source of additional information about an element in a XML file. Attribute values may be listed as name value pairs (name="value") in the start tag of an element.

Type: - Indicates whether a data item represents a number, date, character string, etc.

Maximum Length: - Indicates the maximum number of characters that can be provided in the XML.

Description: - Provides a summary description of the XML tag.

4. Consumer Request XML Format

A sample Consumer Request XML format for Purpose of Inquiry as **New Credit Application or Review of Guarantor** is displayed below:

```
<REQUEST REQUEST_ID="1">
  <REQUEST_PARAMETERS>
    <REPORT_PARAMETERS REPORT_ID=" 14616" SUBJECT_TYPE="1" RESPONSE_TYPE="1" />
  <PURPOSE_OF_INQUIRY CODE="1" />

6. Consumer / Commercial Request XML Format Description

Attribute	Data Type	Maximum Length	Description
REQUEST_ID	Numeric	NA	Unique ID for identifying the request and response. Allows for establishing handshake between D&B Credit Bureau's and subscriber's system.
REPORT_ID	Numeric	NA	Type of Report Requested. Please refer to the Report ID Catalogues for the valid list of codes.
SUBJECT_TYPE	Numeric	NA	Subject's Type. Please refer to the Subject Type Catalogues for the valid list of codes.
RESPONSE_TYPE	Numeric	NA	Response Type. The default value is 1 (for XML)
CODE	Numeric	NA	Identifying the Purpose of Inquiry. Please refer to the Inquiry Reason Catalogues for the valid list of codes.
NAME	Text	256	Subject's Name in English
IDENTIFIER_NUMBER	Text	32	Subject's ID. This tag is optional.
MOBILE	Numeric	16	Consumer Subject's mobile number. This tag is optional
DATEOFBIRTH	Date	NA	Consumer Subject's Date of Birth. Date Format: DD-MMM-YYYY. E.g., 01-JAN-2011.

SB1 - Tanzania Credit Bureau Live Request User Manual

Attribute	Data Type	Maximum Length	Description
NATIONALITY	Text	NA	Consumer Subject's Nationality. Please refer to the Nationality Catalogues for the valid list of codes.
DATEOFREGISTRATION	Date	NA	Commercial Subject's Date of Registration. Date Format: DD-MMM-YYYY. E.g., 01-JAN-2011.
ACCOUNTNUMBER	Text	32	Subject's Credit Facility Account number

7. Response – No Hit XML

When no subject is found in the report, the system generates a No Hit XML.

```
-<DATAPACKET>
  -<ReportDetails>
    -<ReportDetails>
      <CIR_NUMBER>W-0000029549/2013</CIR_NUMBER>
      <RUID>-1</RUID>
      <USER_ID>10008000102</USER_ID>
      <REPORT_ORDER_DATE>26-Nov-2013</REPORT_ORDER_DATE>
      <INSTITUTION_NAME>IDFC Bank</INSTITUTION_NAME>
    </ReportDetails>
  </ReportDetails>-<SearchDetails>
    -<SearchDetails>
      <NAME>KEZIA BATHULA</NAME>
      <SRCHCONFSCORE>0%</SRCHCONFSCORE>
      <NATIONALITY>Tanzania</NATIONALITY>
      <DATE_OF_BIRTH>10-May-1980</DATE_OF_BIRTH>
      <MOBILE_NUMBER>223123456</MOBILE_NUMBER>
    </SearchDetails>
  </SearchDetails><SearchAccountDetails/>
</DATAPACKET>
```

8. Response – Multi Hit XML

When the Search results in more than one Subject, the system generates Multi Hit XML

```
<DATAPACKET REQUEST_ID="1">
  <HEADER>
    <RESPONSE-TYPE DESCRIPTION = "Response Search List " />
    <REQUEST-PARAMETERS>
      <REPORT-PARAMETERS SEARCH-REQUEST-ID = "33805" REPORT-ID = "14618"
SUBJECT-TYPE ="2" RESPONSE-TYPE ="3"/>
    </REQUEST-PARAMETERS>
  </HEADER>
  <BODY>
    <SEARCH-RESULT-LIST>
      <SEARCH-RESULT-ITEM ENTITY-KEY ="22351" NAME = "THE PL WORLDWAYS LTD">
        <DOR>30 Oct 1987</DOR>
        <IDENTIFIER-TYPE>Business Registration Number</IDENTIFIER-TYPE>
        <IDENTIFIER-NUMBER>VFL410FG457</IDENTIFIER-NUMBER>
        <ADDRESS></ADDRESS>
        <OFFICE-TELEPHONE-NUMBER>4458465</OFFICE-TELEPHONE-NUMBER>
        <MATCHED-PARAMETER>Name</MATCHED-PARAMETER>
        <SEARCHSCORE>60</SEARCHSCORE>
      </SEARCH-RESULT-ITEM>
      <SEARCH-RESULT-ITEM ENTITY-KEY ="22320" NAME = "THE PL WORLDWAYS LTD">
        <DOR>30 Oct 1987</DOR>
        <IDENTIFIER-TYPE>Business Registration Number</IDENTIFIER-TYPE>
        <IDENTIFIER-NUMBER>1MOPQ8976T52</IDENTIFIER-NUMBER>
        <ADDRESS>BUSS LOC ADD LINE1</ADDRESS>
        <OFFICE-TELEPHONE-NUMBER>4458465</OFFICE-TELEPHONE-NUMBER>
        <MATCHED-PARAMETER>Name</MATCHED-PARAMETER>
        <SEARCHSCORE>60</SEARCHSCORE>
      </SEARCH-RESULT-ITEM>
    </SEARCH-RESULT-LIST>
  </BODY>
</DATAPACKET>
```

To generate a report on one of the search results, another Request XML should be sent back to the Live Request system with the corresponding Entity Key and Search Score of the Subject as per the below format.

```
<REQUEST REQUEST_ID="1">
  <REQUEST_PARAMETERS>
    <REPORT_PARAMETERS SEARCH_REQUEST_ID="32514" REPORT_ID="14616"
SUBJECT_TYPE="1" RESPONSE_TYPE="1"
  />
  </REQUEST_PARAMETERS>
  <SEARCH_PARAMETERS>
    <SEARCHSCORE>60</SEARCHSCORE>
    <ENTITYKEY>1371</ENTITYKEY>
  </SEARCH_PARAMETERS>
```

</REQUEST>

To merge two or more Subjects, the Subscriber user is required to send back another Request XML containing the details of the Subjects to be merged to generate the report in the below format

```
<REQUEST REQUEST_ID="2">
  <REQUEST_PARAMETERS>
    <REPORT_PARAMETERS SEARCH_REQUEST_ID="32514" REPORT_ID=" 14616"
SUBJECT_TYPE="1" RESPONSE_TYPE="1" />
  </REQUEST_PARAMETERS>
  <SEARCH_PARAMETERS>
    <SEARCHSCORE>60</SEARCHSCORE>
    <ENTITYKEY>1371,14031,8362</ENTITYKEY>
  </SEARCH_PARAMETERS>
</REQUEST>
```

The SEARCHSCORE value is the search confidence score of the primary Subject. The ENTITYKEY value is the entity keys of the Subjects that are to be merged to generate the Report Response XML. The first entity key in the list is the entity key of the primary Subject.

9. Response – Single Hit

When the search results in a Single Hit, the corresponding CIR XML shall be generated.

9.1. Credit Report

The definition of the tags and attributes in the Response CIR Data Packet is provided below.

The Contents of the <DATAPACKET> XML tag is briefed below:

9.1.1. Report details

Attribute	Description
CIR_NUMBER	It is a unique number associated with a CIR. This can be used to uniquely identify a CIR and also to retrieve the report from history, if required.
INSTITUTION_NAME	The name of the Subscriber institution that pulled the CIR from the system
REPORT_ORDER_DATE	The date and time at which the CIR was generated
USER_ID	ID of the subscriber user that was used to generate the CIR

9.1.2. Search details on Consumer CIR

Attribute	Description
NAME	Subject's Name
NATIONALITY	Subject's Nationality
IDENTIFIER_NUMBER	Subject's Identifier Number
MOBILE	The Subject's 'Cellular Phone Number' provided by the subscriber user during search
DATE_OF_BIRTH	Subject's Date of birth
SEARCHSCORE	The search confidence score calculated by the system for the CIR. The value varies depending on the search parameters provided and how they match against the information in the system

9.1.3. Account Number/Customer Code Search

Attribute	Description
NAME	Subject's Name
CUSTOMER_NUMBER	The Subject's Customer Code provided by the subscriber user during search
ACCOUNT_NUMBER	The Subject's loan account number provided by the subscriber user during search

9.1.4. Search details on Commercial CIR

Attribute	Description
NAME	Subject's Name
IDENTIFIER_NUMBER	Subject's Identifier Number
DATE_OF_REGISTRATION	The Subject's 'Establishment Date' provided by the subscriber user during search
SEARCHSCORE	The search confidence score calculated by the system for the CIR. The value varies depending on the search parameters provided and how they match against the information in the system

9.1.5. Consumer details

Attribute	Description
ENTITY_NAME_EN	Full Name (First name Middle name Last name Birth surname) of the Subject as present in DBCB Tanzania system
date_of_birth	Date of Birth of the Subject as present in DBCB Tanzania system in dd-mmm-yyyy format
Gender	Gender of the Subject as present in DBCB Tanzania system
Nationality	Subject's Nationality, as present in the DBCB Tanzania system
Citizenship	Subject's Citizenship, as present in the DBCB Tanzania system
DisofBirth	District where the Subject is born as present in DBCB Tanzania system
Country_of_Birth	Country where the Subject is born as present in DBCB Tanzania system

SB1 - Tanzania Credit Bureau Live Request User Manual

Attribute	Description
marital_status	Marital Status of the Subject as present in DBCB Tanzania system
Surname	Birth Surname of the Subject as present in DBCB Tanzania system
HiEducation	Highest Education achieved by the subject, as present in the DBCB Tanzania system
Mobile	Latest Cellular Phone Number of the Subject as present in DBCB Tanzania system
DptSpouse	Number of dependent spouses of the Subject as present in DBCB Tanzania system
DptChild	Number of dependent children of the Subject as present in DBCB Tanzania system
Address	Latest Address of the Subject as present in DBCB Tanzania system

9.1.6. Commercial details

Attribute	Description
ENTITY_NAME_EN	Trade Name of the Subject as present in DBCB Tanzania system
DATE_OF_REGISTRATION	Establishment Date of the Subject as present in DBCB Tanzania system in dd-mmm-yyyy format
id_umber	Registration Number of the Subject as present in DBCB Tanzania system
Country_of_Registration	Registration country of the Subject as present in DBCB Tanzania system
Tax_Identification_Number	Tax Identification Number of the Subject as present in DBCB Tanzania system
LEGAL_FORM	Legal form of the Subject as present in DBCB Tanzania system
NumberOfEmployees	Latest number of employees of the Subject as present in DBCB Tanzania system
Address	Latest Address of the Subject as present in DBCB Tanzania system

9.1.7. Identification Details (Consumer)

Attribute	Description
id_umber	Identification number of the Subject corresponding to the identifier type, as present in the DBCB Tanzania system. The system may display multiple identification numbers of the subject as per the availability in the DBCB Tanzania system.
id_type	Identifier Type of the Subject's Identification number, as present in the DBCB Tanzania system. The system may display multiple identifier types of the subject as per the availability in the DBCB Tanzania system.
issue_dt	Date when the Identification number is issued, as present in the DBCB Tanzania system.
issue_location	Location where the Identification number was issued, as present in the DBCB Tanzania system.
expiry_date	Date when the Identification number would be expired, as present in the DBCB Tanzania system.

9.1.8. Credit Profile Overview

Attribute	Description
ACCCount	Total number of loans with Phase of Loan as Existing
collateralCount	Total number of Collaterals pledged for all the secured loans
TZS_TOTAL_BALANCE, USD_TOTAL_BALANCE, GBP_TOTAL_BALANCE EUR_TOTAL_BALANCE AED_TOTAL_BALANCE OTHER_TOTAL_BALANCE	Sum total of Outstanding residual amount before maturity day and Overdue amount after maturity day for Active loans (loans with Phase of Loan as Existing)
TZS_TOTAL_AMT_PASTDUE, USD_TOTAL_AMT_PASTDUE GBP_TOTAL_AMT_PASTDUE EUR_TOTAL_AMT_PASTDUE AED_TOTAL_AMT_PASTDUE	Sum total of Overdue amount after maturity day for Active loans (loans with Phase of Loan as Existing)

SB1 - Tanzania Credit Bureau Live Request User Manual

Attribute	Description
OTHER_TOTAL_AMT_PASTDUE	
NoofCrstowhomsubjectisIndebted	Total number of Member Institutions which have granted a credit facility to the Subject. Only active/open credit facilities/accounts are considered.
numofloansguaranteed	Number of Active Loans where Subject's role (Role of Client) is Guarantor
NoofPaidOffACsinPast30Days	Number of Accounts reported with phase of loan as a value other than Existing in the past 30 days (the period is calculated based on the Report Order Date)
unpaidInstal30daysOD	Total Number of Instalments reported with 'Past due days' as less than 30. Applicable only for Active Instalment loans
unpaidInstal60daysOD	Total Number of Instalments reported with 'Past due days' as greater than 60. Applicable only for Active Instalment loans
unpaidInstal360daysOD	Total Number of Instalments reported with 'Past due days' as a value between 90 and 360. Applicable only for Active Instalment loans
NUM_OF_INQUIRIES_BY_FA	Excluding the self-inquiries done by the Subject, the system shall display all the inquiries made by financial institutions within the last 3 months from the date report was pulled.
NoofACCsUnderLegalDispute	Number of Active loans with Unresolved dispute field reported as True (Yes)
mostnegstatus	Negative status of the client with highest weight reported
NegStatusReportedDate	Date when the Negative status of the client with highest weight is reported
NoofACCsAssignedforCollection	No. of Accounts Assigned for Collection
NoofACCsProvisionedbyCrS	No. of Accounts Provisioned by Creditor(s)
ACCsUnknownNoofPastDueDays	Accounts with Unknown No. of Days Past Due
TotAmtProvisionedbyCrS	Total Amt. Provisioned by Creditor(s)

9.1.9. Credit Exposure by Credit Type

Attribute	Description
liability	Role of the Subject in the credit facility (Borrower / Co-borrower / Guarantor)
Product	Type of instalment loan or Type of non instalment loan or Type of credit card loan
Currency	Currency of loan
approval_amt	Sum total of the 'Total amount of the loan' field of all the active loans grouped based on Type of loan
utilization	This field gives the percentage of amount utilized out of the total amount of the loan. This is calculated as: (Used amount or Outstanding residual amount before maturity day + Overdue amount after maturity day)/ Total amount of the loan)*100. This is applicable only for the Active Non Instalment loans and Credit cards and Revolving loans and which are grouped based on Institution Type
AmtDisbursedinPast90Days	Amt. Disbursed in Past 90 Days
AmtUtilizedinPast90Days	Amt. Utilized in Past 90 Days
TotAmtPaidtoDate	Total Amt. Paid to Date
Total_Balance_Amt	Sum total of Outstanding residual amount before maturity day and Overdue amount after maturity day for Active loans (loans with Phase of Loan as Existing) grouped based on Type of loan

9.1.10. Classification of Active accounts by Institution type

Attribute	Description
INSTITUTION_TYPE	This indicates type of institution that the Subject has availed credit from (Commercial Banks/Specialized Banks/Financial and Leasing Companies)
Currency	Currency of loan
no_of_accounts	Count of Active loans grouped based on Institution Type
total_approval_amount	Sum total of 'Total amount of the loan' of all the Active loans grouped based on Institution Type

SB1 - Tanzania Credit Bureau Live Request User Manual

Attribute	Description
balance_amount	Sum total of Outstanding residual amount before maturity day and Overdue amount after maturity day for Active loans (loans with Phase of Loan as Existing) grouped based on Institution Type
overdue_amount	Total Overdue amount after maturity day
overdue_percentage	(Overdue amount after maturity day / Total Outstanding Balance) * 100
recent_overdue	Last reported Overdue amount after maturity day of the loans availed by the subject
recent_overdue_date	Date when the Recent Overdue Amt. is reported by the member institutions
highest_overdue_amount	Maximum Overdue amount after maturity day of the loans availed by the subject
highest_overdue_date	Date when the Highest Overdue Amt. is reported by the member institutions
six_month_cf	Count of all the loans whose Start date of the loan falls in the last 6 months grouped based on Institution Type (the period is calculated based on the Report Order Date)

9.1.11. Credit Exposure by Product

Attribute	Description
Product	The type of the Credit Facility availed by the Subject.
Currency	Currency of loan
noofActiveCFs	The number of credit facilities availed under the particular type. This field considers only the active credit facilities.
NotOverdue	Amount which the Subject should pay in the future (sum of payments before its maturity day). This field does not include Overdue Amount. This field together with field 'Total Overdue Amount after maturity day' creates total credit exposure for this operation.
AmountOverdue	Amount that has not been paid by the Subject on its due date and is pending for payment.
UnutilisedCredit	This field is calculated only for Credit cards and Revolving Loans. It is calculated as Total amount of the loan - [(Outstanding Residual Amt. +Amt. Overdue) or Used Amount]

9.1.12. Inquiry History Summary

Attribute	Description
INSTITUTION_TYPE	Refers to the type of the institution making the inquiry.
NUM_OF_INQUIRIES	Refers to the total count of inquiries made on the Subject by institutions of a particular type

9.1.13. Inquiry Count by Institution type Pie chart

Attribute	Description
LABEL	Refers to the type of institution
RATIO_PERCENTAGE	Refers to the percentage of inquiries made by a particular institution type among all the inquiries made by different institution types

9.1.14. Credit Facility details – Open accounts

9.1.14.1. Main Details

Attribute	Description
BANK	The Member Institution from which the Subject has availed the credit facility
PRODUCTDESC	The type of credit that has been availed by the Subject
PURPOSE	The purpose for which the credit has been availed. This is not the same as type. For example, a tractor loan would come under the Credit Facility Type of 'Vehicle loan' however, the Purpose of the Credit Facility could be 'Agricultural or Forest Related'
economysector	Economic Sector corresponding to the loan.
negativestatus	The most current status of loan as reported by the member institution. It helps to identify the performance of the loan
negativestatus_client	The most current status of the Subject as reported by the Member Institution against this Credit Facility.
REPORTEDDT	The latest date on which the particular Credit Facility was reported to DBCB Tanzania system. This means that whatever status information is

SB1 - Tanzania Credit Bureau Live Request User Manual

Attribute	Description
	reported within the table is valid only as on this date.
CURRENCY	The currency in which the Credit Facility has been provided
APPROVALAMT	The total amount that has been granted to the Subject by the Member Institution on the Credit Facility

9.1.14.2. Loan Details

Attribute	Description
ACTIVATEDDATE	Date of approval. Date, when the Credit Facility contract was signed between the Subject and Member Institution and the Subject confirmed his obligation to pay.
MATURITYDATE	The date when all commitments of the Subject should be fulfilled as per the contract. This is the standard agreed end date of contract stated in agreement.
NUM_OF_INSTALLMENTS	The total number of instalments that the Subject has to pay as per the contract. This field is applicable for instalment type loans.
installmenttype	Catalogue value that shall indicate whether the type of instalments is fixed or variable. This field is applicable for instalment type loans.
INSTALLMENTAMT	The amount that is to be paid by the Subject on regular intervals throughout the tenure of the Credit Facility .This field is applicable for instalment, credit card and revolving loans.
